

SKiM Virtual Learning Route: Sharing knowledge management best practices to scale

Published on: December 2, 2020, Submitted by Valerio Graziano on: December 2, 2020

Learning Routes were introduced as a key knowledge management and learning methodology to the Sudan in the context of the IFAD Country Programme. Learning Routes are a means to exchange knowledge between peers, here usually farmers and rural development practitioners. Sudanese development stakeholders started abroad with Learning Routes on Best Practices in Natural Resource Management, Agricultural Productivity and Women Empowerment. Then insights were modified and successfully applied to the Sudanese project contexts and have significantly contributed towards greater development effectiveness. The Learning Route Methodology has been recognized, replicated, scaled up and institutionalized.

SKiM Sudan Country Source Book

) publish together a wealth of Information on Sudanese agricultural knowledge management best practices, through a closely monitored and interactive-like social media campaign on Virtual Learning Route from 30 November to 4 December, 2020. The SKiM partners shall coordinate in a multi-stakeholder effort to bring the social media users along the path of the Learning Route, guiding them through agricultural challenges and knowledge expertise in the Sudanese context.

All the best practices shall be available open access, the online campaign will feature the publication of the Sudan Country Source Book, one introductory interview, four Case Studies and a Learning Survey that will allow users to connect directly with the knowledge providers. This new approach shall contribute to raise awareness on the importance of knowledge management as an asset for rural development, through peer-learning, knowledge sharing and south-to-south cooperation.

More about SKiM

Strengthening Knowledge Management for Greater Development Effectiveness in the Near East, North Africa, Central Asia and Europe (SKiM) is a grant project led by ICARDA and funded by IFAD. The project also collaborates with international partners CIHEAM-Bari, PROCASUR, Virginia Tech as well as NARS, governments, and agricultural extension services in Moldova, Morocco and Sudan.

Initiated in June 2018, the project facilitates and supports KM and capacity development activities in the three selected countries, providing practical examples of KM best practices for analysis and adoption by participating institutions. Increasing the capacities of participating public institutions, by providing necessary structures and systems at the country and regional levels, ensures that knowledge can be effectively managed for long-term growth and development.

) provides background information and outlines the project team, partners and stakeholders. The website also shares key documents including the project proposal, and outlines the goals, objectives and impact pathway of the project, as well as additional resources and information on news and events.

) is the open access page showcasing the latest info and achievements of SKiM institutions, organizations and networks partnering in Knowledge Management worldwide.
