

50-minutes Farming with Alternative Pollinators film now with subtitles in Tajik and Russian

Published on: March 18, 2021, Submitted by Stefanie Christmann on: March 16, 2021

Caritas Switzerland, with financial contribution from the Principality of Liechtenstein, has facilitated the subtitling of the film to Tajik and Russian to make it accessible to farmers, extension experts, NARS and policymakers in Tajikistan. Caritas Switzerland is also promoting the film within ongoing discussions related to the need for a national strategy on pollinators in Tajikistan, as well as to better integrate pollinator protection into country programs.

Late Prof. Qadamshoev, an excellent pollinator specialist from Khorog/Tajikistan, who strongly advocated for a FAP project in Tajikistan.

Russian. In Tajikistan, Tajik is the official language for government correspondence as well as for everyday use, while Russian is

prominent within academic and literary circles. In addition to contributing to scientific knowledge in Tajikistan, the Russian version enables access within other countries in the region of Central Asia as well as to former Soviet republics within Eastern Europe.

Coalition of the willing on pollinators or which develop a national strategy and action plan for pollinator protection – and of course for everybody who wants to contribute to safeguarding these important species.

Arabic and we encourage other organizations to contact ICARDA for synchronization to more languages (see the email in the end of the film).
